

STRATA Coffee Table

Designed by Mangrove Studio

The Strata collection embraces this inspiration and tells a geological story where beautifully irregular stone forms showcase and celebrate the textures and natural patterns created by our SPI printing technology.

The top of each piece is made smooth, inviting touch and interaction. At a universal height across the collection are two highly polished lines of aluminum, which catch dazzling light, and elevate the design. One can see this detail like a line of quartz through a mountain side, or a high-water mark on monolithic rock. Furthermore, this aluminum echoes the concrete layer lines, emphasizing unique textures as an intentional design detail.

Surface Finishing

Natural finish with polished top and sides

Options

This product is available in any listed integral color option, with further custom upon request
