

PROJECT FEATURE

PATIO SHOWROOM

GREENLINE, INC

LANDSCAPE ARCHITECT: MATT MICHMERHUIZEN

MANGROVE PRODUCTS FEATURED IN THIS INSTALLATION

Shoreline Caps

Sova Seating

Wave Bench

Oberhauser Balloon

DESIGN

Mangrove and Greenline brought together materials and product that complimented one another in color, form, and application. For Mangrove, we used our natural Limestone color, a warm light grey with flecks of Michigan beach sand coloration in its texture. We focused on organic and soft forms in our custom design, which was grounded and balanced with Greenline's dark CMU hardscaping and tasteful landscaping.

BEYOND THE BASICS

The project goes beyond a traditional patio by functioning as an outdoor showroom and product-development proving ground. Conventional pavers, steps, and retaining-wall products were creatively integrated with never-before-seen 3D concrete amenities - using walls as structural foundations and paved surfaces as flexible display and demonstration areas.

CRAFTSMANSHIP & FINISH QUALITY

Craftmanship is demonstrated through precise paver alignment, consistent joint spacing, smooth radiuses, accurate elevations, and clean transitions between steps, walls, borders, and paving surfaces. Sweeping curves and crisp straight lines required careful layout to produce a polished, intentional, and highly functional finished space.

INTEGRATION WITH ARCHITECTURE

The hardscape was designed to compliment rather than compete with the headquarters. Coordinated colors, carefully scaled walls, elevation changes, and intentional sightlines connect the building to the outdoor space, feeling warm and welcoming while maintaining the contemporary character of the architecture and showcased products.

THE RESULT

The project successfully extended Mangrove's headquarters into an outdoor meeting, showroom, and product-demonstration space, where the visitor journey progresses naturally from the office showroom, to warehouse production, to real-world outdoor application.
